---

*More than 2 years of experience as a Software Developer specialized in Frontend, mainly using the React ecosystem. Focused on mitigating accessibility and performance issues that affect the user experience, with an emphasis on the details that make a difference and represent product quality.*

## PROFESSIONAL EXPERIENCE

---

### NTT DATA

Front-end Developer

**Popayán, Colombia**

February 2022 – March 2023

- Developed various web applications using React and Next.js, including admin dashboards, ERPs, and internal-use apps, working closely with UX/UI designers and backend developers.
- Collaborated on the implementation and design of web platforms, contributing ideas and strategies to enhance user experience and interface quality.
- Optimized web application performance by implementing best practices and strategies in data fetching and consumption.
- Designed and implemented strategies to improve the accessibility of robust web platforms, enhancing navigation, keyboard access, readability, and overall usability.
- Analyzed requirements and translated them into clear, detailed technical specifications to facilitate the development of each feature.

### SENA (Research Group)

FullStack Developer

**Popayán, Colombia**

August 2021 – August 2022

- Collected and analyzed information to draft functional and non-functional requirements, prioritizing them for the MVP.
- Collaborated in designing the app for both desktop and mobile, reducing overall project delivery time by half.
- Implemented the Figma design with pixel-perfect accuracy.
- Consumed REST APIs to integrate a reward system based on points earned by completing challenges in the app. Implemented authentication flow using OAuth (e.g., Google) and displayed corresponding data across interfaces.

## EDUCATION

---
